

Introducing
RaceTrayTM

*We combined the best features of cable tray
and surface raceway into **the world's most
beautiful cable tray.***SM

U.C. Berkeley

A cable tray for the ages...

RaceTray™ is a patented cable tray system designed to be beautifully exposed - where function and convenience marry with architectural appeal. **RaceTray combines the best features of cable tray and raceway** into one elegant system that's suitable for all environments.

RaceTray is easy to install and always fully accessible for cabling upgrades. When above-ceiling routing is not an option, or simply not a preferred location, RaceTray is a solution that offers eye appeal as well as installation cost savings. RaceTray will never be confused with conventional duct work.

Once installed, the architectural appeal of RaceTray is unmatched by any other cable tray. A remarkable **integrated truss design** permits loading of 75 pounds per foot without any bending or deflection – all without support brackets.

Wall-mounted and center-hung styles are available in a full range of dimensions, along with a complete array of fittings, dividers, covers, and accessories.

RaceTray is **perfect for universities, historical buildings, commercial environments, corridors, and any project for which architectural enhancement is the design criteria.** Engineered to last a building's lifetime while maintaining its good looks.

University of Texas

DEI Electrical Consultants (shown with ambient lighting)

Grove City College

Two Styles. Two Complete Systems.

Available in Wall Hung and
Center Hung Styles.

RaceTray Features:
