

MonoSystems™
wire management. managed.™

Harness the power of the sun with the **SolarTrak™** solar cabling system.

SolarTrak's ease of installation and flexible design
sheds new light on solar cable management.

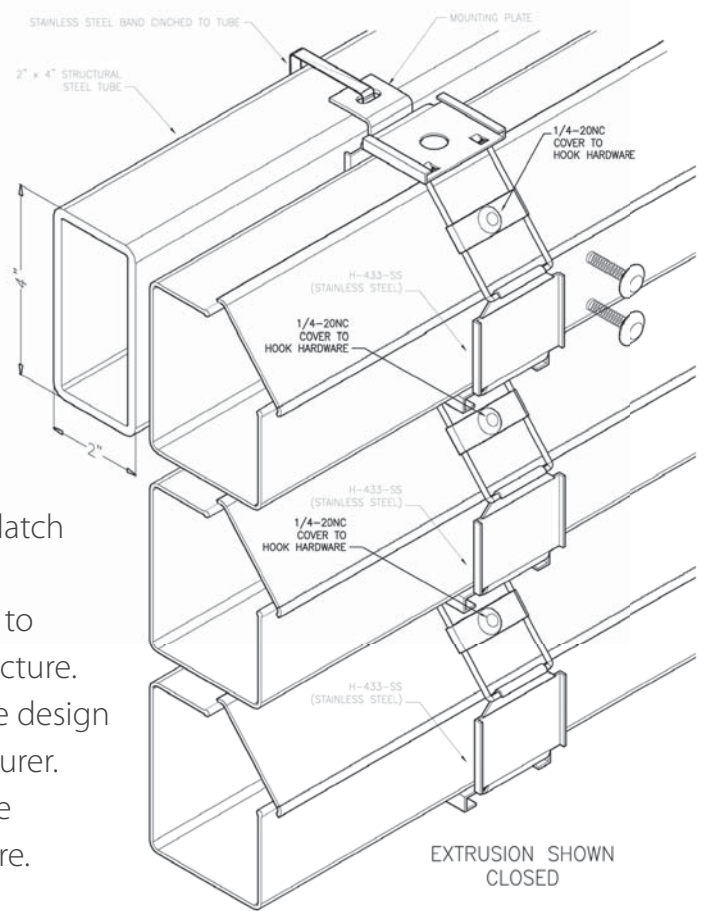

A sustainable solution

Environmentally friendly SolarTrak will allow you to make the most of your solar panel initiatives.

When it comes to solar panel installations, don't make cable management your final thought. New **SolarTrak** provides you with a better solution when compared to expensive, unforgiving cable ties. **SolarTrak** uses a unique latch system that allows easier access to your cabling system at **any** time. And there is no penetration to the horizontal member of the solar support structure. This allows your grounding to remain true to the design established by your support structure manufacturer. Plus finally, there will be **zero** compromise to the strength and integrity of the supporting structure.
