FOR IMMEDIATE RELEASE

January 1, 2011

INNOVATIVE J-HOOK FROM MONOSYSTEMS RECEIVES U.S. PATENT!

The Hook, exclusively offered from MonoSystems, is the world's only J-Hook with the capability of infinitely linking together without the need for any additional hardware, brackets, or other costly, cumbersome, and labor-intensive items. No prior planning, ordering, or lead times. The innovative product has just received a U.S. Patent.

"Never has simplicity been so useful and flexible", said Jordan Handler, President of MonoSystems, Inc. "The Hook is perfect for so many cable and wiring solutions ... and it holds it's own in congested or crowded areas", he continued. The Hook is easy to mount where needed on it's own or in groups when it's necessary to separate wires or cables such as in fire, alarm and video installations. The Hook can also be hung back to back when needed.

The Hook can be tiered to provide segregation of services like Fire, Alarm, and Video. For back-to-back installations, you can use the center hanger plate and tier almost endlessly. The product is essentially a 4" by 3" spring steel hook with a 2" wide cable bearing surface. A cable retaining cage provides extra cable security. The Hook is perfect for all types of cables, innerduct, and more. Fully plenum rated, and meets all NEC and EIA/TIA requirements for structured cabling systems. Each Hook can accommodate up to 150 4-pair UTP Cat. 5e cables, and will support a static load of 100 pounds.

Perfect for most wall, strut and suspension mountings, The Hook provides 7.5 square inches of cable containment area.

About MonoSystems

For over forty-years, MonoSystems has offered a complete line of wire management products for electrical contractors and engineers – surface raceways, cable trays, poke-throughs, floor and wall duct, and more. The products are utilized in a variety of applications that include: schools & universities; research facilities; laboratories; hospitals; retail and casinos. Many of their products are patented or under patent approval. For more information, please contact Jordan Handler at 1-888-764-7681 or via email at jhandler@monosystems.com
