

Cable Tray / Ladder / Aluminum B4A Series

NEMA Load Class: 16B / 12C

CSA Load Class: D1-3m

PowerTray™

Manufactured in the USA by MonoSystems, Inc.

B4A/STRAIGHT SECTION

General Information

TRAY DESIGN: Construction and markings are per the latest edition of NEMA Standards Pub. VE1, CSA C22.2 No. 126.

TRAY GROUNDING CAPABILITY: Classified as an equipment grounding conductor per N.E.C. 392.7 with a maximum 1600 ampere rating. UL Cross Sectional area: 1.00 in²

CONNECTORS: Supplied in pairs with hardware. Splice resistance is less than 0.00033 ohms. Standard hardware: 3/8 in. cadmium-plated with clear zinc topcoat. Stainless steel hardware is available upon request.

MonoSystems trays marked with CSA load class have been tested (loading, finish and electrical) by UL to CSA standard 126 22.2

Material: Aluminum 6063-T6 Alloy

Siderail: 4.12"
Load Depth: 3.05"

LOAD CHART*

POWER-TRAY RAIL DATA	RAIL TYPE: B4A					
SPAN (ft)	6	8	10	12	14	16
MAX LOAD (lbs/ft)	487	284	181	126	93	71
DEFLECTION MULTIPLIER	0.001	0.003	0.008	0.016	0.030	0.052

Classified by UL as equipment grounding conductors per NEC 392.7.

* Values are based on simple beam tests per NEMA VE 1 on 36" wide cable tray with rungs spaced on 12" centers. Cable trays will support, without collapse, a 200 lb. (90.7 kg) concentrated load over and above published loads. Published load safety factor is 1.5.

To convert 1.5 safety factor to 2.0, multiply the published load by 0.75. To obtain mid-span deflection, multiply a load by the deflection multiplier. Cable tray must be supported on spans shorter than or equal to the length of the cable tray being installed.

Individual rungs will support without collapse a 200 lb. (90.7 kg) concentrated load applied at the mid-span of the rung, over and above the NEMA rated cable load with a 1.5 safety factor for highlighted NEMA spans and loads.

	MAX LOAD (lbs/ft)		233	184	149	123	103	95
	DEFLECTION MULTIPLIER		0.0064	0.010	0.016	0.023	0.033	0.038

Classified by UL
as equipment
grounding
conductors per
NEC 392.7.

* Values are based on simple beam tests per NEMA VE 1 on 36" wide cable tray with rungs spaced on 12" centers. Cable trays will support, without collapse, a 200 lb. (90.7 kg) concentrated load over and above published loads. Published load safety factor is 1.5.

To convert 1.5 safety factor to 2.0, multiply the published load by 0.75. To obtain mid-span deflection, multiply a load by the deflection multiplier. Cable tray must be supported on spans shorter than or equal to the length of the cable tray being installed.

Individual rungs will support without collapse a 200 lb. (90.7 kg) concentrated load applied at the mid-span of the rung, over and above the NEMA rated cable load with a 1.5 safety factor for highlighted NEMA spans and loads.

ML4A/STRAIGHT SECTION

General Information

TRAY DESIGN: Construction and markings are per the latest edition of NEMA Standards Pub. VE1, CSA C22.2 No. 126.

TRAY GROUNDING CAPABILITY: Classified as an equipment grounding conductor per N.E.C. 392.7 with a maximum 1600 ampere rating. UL Cross Sectional area: 0.60 in²

CONNECTORS: Supplied in pairs with hardware. Splice resistance is less than 0.00033 ohms. Standard hardware: 1/4 in. cadmium-plated with clear zinc topcoat. Stainless steel hardware is available upon request.

MonoSystems trays marked with CSA load class have been tested (loading, finish and electrical) by UL to CSA standard 126 22.2

Material: Aluminum 6063-T6 Alloy

Siderail: 3.95"
Load Depth: 3.08"

CONNECTOR

LOAD CHART*

POWER-TRAY RAIL DATA	RAIL TYPE: L4A			
SPAN (ft)	6	8	10	12
MAX LOAD (lbs/ft)	200	113	72	50
DEFLECTION MULTIPLIER	0.0015	0.0047	0.011	0.024

Classified by UL
as equipment
grounding
conductors per
NEC 392.7.

* Values are based on simple beam tests per NEMA VE 1 on 36" wide cable tray with rungs spaced on 12" centers. Cable trays will support, without collapse, a 200 lb. (90.7 kg) concentrated load over and above published loads. Published load safety factor is 1.5.

To convert 1.5 safety factor to 2.0, multiply the published load by 0.75. To obtain mid-span deflection, multiply a load by the deflection multiplier. Cable tray must be supported on spans shorter than or equal to the length of the cable tray being installed.

Individual rungs will support without collapse a 200 lb. (90.7 kg) concentrated load applied at the mid-span of the rung, over and above the NEMA rated cable load with a 1.5 safety factor for highlighted NEMA spans and loads.

HORIZONTAL CROSS COVER, DIAMOND PLATE

Notes:

- 1.) Material: 6" wide, 9" wide, 12" wide or 18" wide: 1/8" thick aluminum diamond plate. Material: 24" wide: 3/16" thick aluminum diamond plate.
- 2.) All mounting hardware (by others). MonoSystems recommends fastening cover to power tray fitting using 1/4" hardware. Feed screws thru hole in cover, mark and drill thru top siderail flange of tray and attach on other side with 1/4-20 nylon lock nut. Or install self tapping screws through holes in cover into tray. Be sure to completely align cover to tray before drilling and installing.
- 3.) Views for reference - do not scale.

Manufactured by MonoSystems, Inc.

12" L HEAVY DUTY SPLICE PLATES FIT-SPAN™ SYSTEM - A6-2014-PR

Notes:

- 1.) A6-2014-PR Fit-Span splice plates supplied as pairs. Includes 1/2" mounting hardware.
- 2.) For use as part of Fit-Span 6" tangent fitting systems.
- 3.) When connecting to straight tray sections - HD6A or D6A aluminum heavy tray: position A6-2014 Fit-Span splice plate in place (as a template) centered about the seam of the tray connection. Using a marker or punch, mark the (6X) hole locations on the tray. Remove the Fit-Span splice plate and field drill 1/2" holes at the marked locations. No field-drilling is required for Fit-Span fittings.
- 4.) Splice plate material: 6063-T6 aluminum, hardware material: 304 stainless steel.
- 5.) Available for use on ladder tray with 9" or 12" rung spacing only.
- 6.) Recommended torque: for 1/2" fasteners: 56 ft-lbs [75.9 N-m].
- 7.) Views for reference - do not scale.

NON-RUNG MOUNTING BOTTOM OF TRAY DROP OUT FOR POWER TRAY

Notes

- 1.) Ordered as each.
- 2.) Non-rung mounting design for installation of dropout from below tray. No drilling required.
- 3.) Slots provided for easy cable tie attachment (by others).
- 4.) Views for reference - do not scale.

Installation

- 5.) To install, position mounting bar with attached drop out centered in place below aluminum PowerTray.
- 6.) With mounting bar flush against bottom of tray, feed (2x) 1/4-20 pan head bolts upward thru clearance holes in mounting bar and into threads of pem nuts within mounting clips.
- 7.) Orient clamps in place such that they clamp against bottom outer side rail lip of tray (as shown). Tighten 1/4-20 pan head bolts allowing the clamps to pull against tray lip until snug.

Cable Tray / Ladder Tray 0800-B6-BLK

PowerTray™ Accessories

Manufactured by MonoSystems, Inc.

RAIL END PROTECTION CAPS

SEE NOTE 1
EACH 0800-B6-BLK
INCLUDES:

Notes:

- 1.) Sold in sets (1-left, 1-right).
- 2.) Use as a protective covering for rail ends of specified power tray.
- 3.) Material: black PVC. Meets UL94 flame resistance requirement.
- 3.) Views for reference - do not scale.

Cable Tray / Ladder Tray AX-2012

PowerTray™ Accessories

Manufactured by MonoSystems, Inc.

HEAVY DUTY STANDARD MID-SPAN SPLICE PLATE

Notes:

- 1.) Ordered as pairs. Includes 1/2" mounting hardware.
- 2.) For 6" high HD6A & D6A aluminum side rail or 7" high D7A & E7A aluminum side rail.
- 3.) Splice plate material: 6063-T6 aluminum, hardware material: stainless steel.
- 4.) Available for use on ladder tray with 9" or 12" rung spacing only.
- 5.) To install to existing tray, position AX-2012 mid-span splice plate in place (as a template) centered about the seam of the tray connection. Using a marker or punch, mark the (6x) hole locations on the tray. Remove the mid-span splice plate and field drill 1/2" holes at the marked locations. Fasten to the side and bottom of side rail using supplied (6x) 1/2 - 13 x 1-1/4" button socket head stainless steel screws & (6X) 1/2 - 13 serrated flanged nuts (per connector side).
- 6.) Recommended torque: for 1/2" fasteners: 56 ft-lbs [75.9 N-m].
- 7.) Views for reference - do not scale.

Material:

Splice plate: 6063-T6 aluminum hardware: 316 stainless steel for aluminum side rail.

CENTER HANGER SUPPORT

Notes

- 1.) Supports ordered as each. Includes:
(1) Center hanger strut support with welded pipe
(2) 3/8"-16 X 3/4" hex bolts, (2) 3/8"-16 spring nuts
(2) X0-1208 hold-down/guide clamps.

Instructions For Solid Bottom Insert Tray:

- 2.) Field drill Ø 1" hole in center of tray where center tray hanger pipe will be inserted.
- 3.) Install spring nuts in strut portion of center hanger.
- 4.) Field drill Ø 7/16" holes in solid bottom insert 1" from inside tray edge.
- 5.) Install bolt thru solid bottom insert and thread into spring nut until snug.
- 6.) Secure center hanger with 1/2" hardware as shown.
1/2" threaded rod and 1/2" hardware (by others).
- 7.) Views for reference. Do not scale.

Cable Tray / Ladder Tray XX-X420-XX

PowerTray™ Accessories

Manufactured in the USA by MonoSystems, Inc.

WALL PENETRATION SLEEVE FOR POWER TRAY

Notes

- Sold as each.
Includes: (1) 20" long solid bottom tray base and removable cover section, cover tek screws, and (2) trim plates.
- Splice connection plates and mounting hardware ordered separately.
- Eliminates the need for high cost custom fabrication.
- Views for reference - Do not scale.
