

Cable Tray/RaceTray/Wall Mounted RTWX-XX-120-PX

RaceTray™

Manufactured in the USA by MonoSystems, Inc.

STEEL RACETRAY, WALL MOUNT

Notes:

- 1.) Patented.
- 2.) Racetray material: 22GA G60 steel.
- 3.) Mount tray by installing #6 drywall screws level into solid support 54" apart. Remove desired 9/32" knockouts located on mounting face of base. Align keyslots in RaceTray with drywall screws and position tray into place. Install 1/4" hardware thru 9/32" holes of removed knockouts or field drill larger holes and mount as required.
- 4.) Connect tray to existing RaceTray by using RTWX-XX-CP couplings (1-provided per tray section). Attach RT-669-braid grounding straps (ordered separately).
- 5.) Install RTWX-XX-SCL seam clip (1-provided per tray section) centered about the RaceTray seam, be sure the clip strap is flush with the tray with the 1/4" flange tucked between the tray and wall. Install supplied #8-32x1/2 tek screws thru 2x pilot holes into top flange of tray. For 12"w style: install provided #8-32 pan head screws thru slots in bottom wrap-around portion of seam clip and thread into tapped holes in tray until snug. Apply epoxy to face of clip which makes contact with bottom of tray and press together tightly, hold in place with tape (by others) until epoxy has cured.
- 6.) Other color & finish options available speak with MonoSystems to choose.
- 7.) Views for reference - do not scale.

Cable Tray / RaceTray / Center Hung RTCX-XX-HE60-PX

RaceTray™ Fittings

Manufactured in the USA by MonoSystems, Inc.

60° HORIZONTAL ELBOW

Notes

For Steel Center Hung RaceTray.

- 1.) For connecting two sections of Center Hung RaceTray at 60°.
- 2.) RaceTray material: G60 Steel.
- 3.) Mount tray using a box beam or threaded rod (by others) attach to pre-mounted support bar as shown.
- 4.) Connect fitting to existing RaceTray by using RTCX-XX-CP couplings (1-provided per elbow). Attach RT-669-BRAID grounding straps (ordered separately).
- 5.) Install RTCX-XX-SCL seam clip (1-provided per elbow) centered about the RaceTray fitting seams, be sure the clip strap is tight. Install supplied #8-32x1/2 tek screws thru 4x pilot holes into top flange of tray.
- 6.) Other color & finish options available speak with MonoSystems to choose.
- 7.) Views for reference - do not scale.

HORIZONTAL TEE, WALL MOUNT TO CENTER HUNG

Notes:

For connecting wall mounted RaceTray to center hung racetray of the same height

- 1.) Racetray material: 22GA G60 steel.
- 2.) Mount tray by installing #6 drywall screws level into solid support to align with key slots. Remove desired 9/32" knockouts located on mounting face of base. Align key slots in racetray with drywall screws and position tray into place. Install 1/4" hardware thru 9/32" holes of removed knockouts or field drill larger holes and mount as required.
- 3.) Connect fitting to existing racetray by using RTWX-XX-CP & RTCX-XX-CP couplings (1 of each provided per tee). Attach RT-669-BRAID grounding straps (ordered separately).
- 4.) Install RTWX-XX-SCL & RTCX-XX-SCL seam clips (1 of each provided per tray section) centered about the race tray seams, be sure the clip straps are flush with the tray and the 1/4" flange of the wall mounted is tucked between the tray and wall. Install supplied #8-32x1/2 tek screws thru upper pilot holes into top flange of tray. Apply epoxy to face of wall mounted clip which makes contact with bottom of tray and press together tightly, hold in place with tape (by others) until epoxy has cured.
- 5.) Other color & finish options available speak with monosystems to choose.
- 6.) Views for reference - do not scale.

STRAIGHT TRANSITION FITTING WALL MOUNT TO CENTER HUNG

Notes:

For connecting wall mounted RaceTray to center hung RaceTray of the same height

- 1.) RaceTray material: 22GA G60 steel.
- 2.) Connect existing racetray sections by using 2X couplings (2X) RTWX-XX-CP and grounding straps (RT-669-braid) each sold separately.
- 3.) Connect fitting to existing racetray by using RTWX-XX-CP couplings (1-Provided per elbow). Attach RT-669-Braid grounding straps. (ordered separately).
- 4.) To install the straight transition fittings: align tray such that the end seam of the wall mounted tray sticks out at least 1-1/4" beyond the end of the wall with no obstructions. Install RTX-XX-STF-XX centered about the correctly oriented (left or right) seam, be sure fitting strap is tight. Install supplied #8-32 tek screws thru 4X pilot holes into top flange of tray.
- 5.) Other color & finish options available speak with Monosystems to choose.

Cable Tray/RaceTray/Wall Mounted RTXX-XX-TF-RTXX-XX-PX

RaceTray™ Fittings

Manufactured by MonoSystems, Inc.

RACETRAY TRANSITION FITTING REDUCER/EXPANDER AND/OR STEP DOWN

Notes:

For connecting wall mounted or center hung RaceTray to wall mounted or center hung RaceTray of a different height and or width

- 1.) RaceTray material: 22GA G60 steel.
- 2.) Connect existing RaceTray sections by using 2X couplings (2X) RTWX-XX-CP and grounding straps (RT-669-Braid) each sold separately.
- 3.) To install the transition fittings: align tray such that the end seam of the wall mounted tray sticks out at least 1-1/4" with no obstructions. Install RTXX-XX-TF-RTXX-XX-XX-PX centered about the correctly oriented (left or right) seam, be sure fitting strap is tight. Install supplied #8-32 Tek screws thru 4X pilot holes into top flange of tray.

Specifying seam clip: as indicated, the orientation is determined as follows:

- * For wall mount to wall mount or center hung to center hung connection: The larger (wider and/or taller) tray is the focal or base tray. So if the connection is made to the left of the larger tray (when looking at the front of the tray) use a -LH, if the connection is made to the right of the larger tray (when looking at the front of the tray) use a -RH connector.
- * For wall mount to center hung connection: the wall mounted tray is the focal or base tray regardless of size. So if the connection is made to the left of the wall mounted tray (when looking at the front of the tray) use a -LH, if the connection is made to the right of the wall mounted tray (when looking at the front of the tray) use a -RH.

- 4.) If connecting wall mounted RaceTray to center hung RaceTray of the same height and width use a straight transition fitting, part number RTX-XX-STF-XX-PX instead.
- 5.) Other color & finish options available speak with Monosystems to choose.
- 6.) Views for reference - do not scale.
